Webinar 2 “GenAI and Critical AI Literacy”

AI.D Prompting Guide

An LLM has no memory but uses patterns to guess answers. It doesn't remember your previous question or answer. Instead, a part of the previous conversation is sent with each request. Once there are too many characters the bot forgets part of your conversation.

Resource 1: Tips for good prompting

- Tell the bot about the setting of your question, so that it can adjust tone and style accordingly.
- Ask the bot what information it needs to give you better answers.
- Give the bot a clear role and task (see examples on the next slide).
- Be specific about what the answer should look like (e.g., examples, length, format, tone, or keywords).
- Write in English if needed (use tools like DeepL or Google Translate).
- Share examples of good answers with the bot.
- Take things step by step. Break down big tasks into smaller parts.
- Edit and adjust the text until you're happy with the result.

1

Resource 2: → Examples for roles and tasks of your bot

What role should the bot take?

- Social media expert, newsletter writer, marketing help, etc.
- Editor
- Proofreader
- Data analyst
- Creative thinker
- Coach
- Trainer/Trainer (for...)
- Consultant (for...)
- Journalist
- Scientist
- Personal assistant

What task should the bot do?

- Summarize information
- Give first ideas
- Provide feedback on your ideas
- Act as someone from your target group
- Advise or interview you
